

SEO Opportunity Diagnostic — The Brunner Law Firm

Prepared for The Brunner Law Firm · thebrunnerlawfirm.com · Report date 2026-09-13

Public-web research and direct page observation on customer-owned pages. Goal: more enquiries (client intake). This is an evidence-led decision report; nothing is guaranteed.

Executive Summary — Highest-Value Decisions

Finding 1 — *Criminal defense page has no visible case results/proof, no after-arrest first-steps guide, and only vague 'flat fees for most matters' without guidance on how to reach the free consultation from this page.* [VALIDATE FIRST]

Customer page: <https://thebrunnerlawfirm.com/practice-areas/criminal-defense.html>

Direct observation: Criminal Defense page states coverage (misdemeanor+felony, TX state and federal) and describes case preparation (discovery, witness interviews, motion practice), and mentions 'Flat fees for most matters' and 'payment plans available', but does not list any case results, outcomes, or testimonials as proof, and does not answer what to do immediately after an arrest or how long a case typically takes.

Buyer question: Will a criminal defense lawyer actually take my case, what does it cost, and what are my first steps after an arrest?

Specific gap: Criminal defense page has no visible case results/proof, no after-arrest first-steps guide, and only vague 'flat fees for most matters' without guidance on how to reach the free consultation from this page.

Business mechanism: A person arrested faces anxiety and urgency; the criminal defense page stops at coverage+prep and does not convert hesitancy into action, so a worried prospect leaves without booking the free consultation, suppressing the engagement enquiries that drive the goal (more leads for the firm).

Recommended change (module): Add an 'Immediate Next Steps After an Arrest' block and a prominent 'Free Case Evaluation' CTA with a phone+form high-light, plus a short 'No upfront fee for the initial consultation' trust line on the criminal-defense page.

Reason accepted by auditor: Addresses urgent arrest anxiety with clear next steps and CTA.

Finding 2 — *Contact form collects details but sets no post-submission expectation, response-time, confidentiality or free-consultation confirmation, so a hesitant prospect may not trust the form or may expect a slow/no reply.* [VALIDATE FIRST]

Customer page: <https://thebrunnerlawfirm.com/contact.html>

Direct observation: Contact page has a form (fields: name, email, practice, subject, message) with 'Free Consultation' and 'Contact Us' CTA text, and hours 'Monday-Friday 9:00 AM-6:00 PM CT', but gives no statement of what happens after submission (response time, next step, whether the consultation is confidential/free), and no proof of past work from this page.

Buyer question: After I submit this form, what happens next, when will someone respond, and is the initial consultation really free and confidential?

Specific gap: Contact form collects details but sets no post-submission expectation, response-time, confidentiality or free-consultation confirmation, so a hesitant prospect may not trust the form or may expect a slow/no reply.

Business mechanism: Post-submission expectation and trust are decision-stage blockers for an anxious new client; a form with no response-time and no free/confidential confirmation suppresses form completions, directly limiting the engagement enquiries that drive more leads.

Recommended change (module): Add a 3-step 'What happens next' under the form (1 review request, 2 call back within stated time, 3 confidential free evaluation) plus a 'Free & confidential initial consultation' trust line.

Reason accepted by auditor: Sets post-submission expectations to boost form trust and completion.

Finding 3 — *Hub lists areas but gives no decision aid mapping a situation/charge to the right practice page, so a prospect cannot self-route and may leave instead of drilling into a matching practice page.* [VALIDATE FIRST]

Customer page: <https://thebrunnerlawfirm.com/practice-areas.html>

Direct observation: Practice Areas hub lists coverage ('Criminal defense is what we do... from misdemeanor citations to first-degree felonies') but only enumerates practice-area names with no guidance helping a prospect self-identify which charge/area applies to their specific situation, and no per-practice fee guidance.

Buyer question: Which practice area does my specific charge fall under, and is it the kind of case this firm handles?

Specific gap: Hub lists areas but gives no decision aid mapping a situation/charge to the right practice page, so a prospect cannot self-route and may leave instead of drilling into a matching practice page.

Business mechanism: A prospect with an ambiguous charge needs a self-routing aid; without one they cannot confirm the firm handles their matter, reducing the progression from hub to the relevant practice page to the free consultation, suppressing leads.

Recommended change (module): Add a 'Which practice area applies to my situation?' selection aid with charge/situation questions routing to the matching practice page, plus a final route to the free consultation.

Reason accepted by auditor: Helps prospects self-route to relevant practice area, reducing exits.

Finding 4 — *Educational article builds authority but has no strong in-body route to the free consultation or phone, so a reader leaves informed but not converted into an enquiry.*

[VALIDATE FIRST]

Customer page: <https://thebrunnerlawfirm.com/blog/what-to-do-after-an-arrest-in-texas.html>

Direct observation: Blog post educates on what to do after a Texas arrest, but does not clearly route a reader to the firm's free consultation CTA from within the body, and does not include a 'Do NOT do this' or 'choose a lawyer' reference from this page — the educational trust asset does not convert to a contact.

Buyer question: I've been arrested or someone I know has — what do I do now, and should I talk to this firm?

Specific gap: Educational article builds authority but has no strong in-body route to the free consultation or phone, so a reader leaves informed but not converted into an enquiry.

Business mechanism: Educational content earns trust but only converts if the reader is guided to act; a post with no prominent consultation/phone CTA loses high-intent readers, leaving leads on the table versus the conversion the goal needs.

Recommended change (module): Add a contextually placed 'Free Confidential Consultation' CTA (phone + form link) mid-article and a 'When to talk to a lawyer' callout, plus a 'Top mistakes to avoid' list.

Reason accepted by auditor: Adds conversion-focused CTAs to educational content.

Finding 5 — *DWI page lacks a DWI-specific first-steps guide, license-suspension process steps, and a route to the free consultation, so the DWI anxious prospect is not converted.*

[VALIDATE FIRST]

Customer page: <https://thebrunnerlawfirm.com/practice-areas/dwi-dui-defense.html>

Direct observation: DWI/DUI page mentions coverage and 'license suspension hearings' but gives no concrete first-steps for a DWI stop/arrest, no fee guidance specific to DWI, and no proof of prior DWI defense outcomes — similar to the criminal-defense page but for the DWI audience.

Buyer question: I was stopped/charged with DWI — what do I do now, what will it cost, and can I keep my license?

Specific gap: DWI page lacks a DWI-specific first-steps guide, license-suspension process steps, and a route to the free consultation, so the DWI anxious prospect is not converted.

Business mechanism: DWI is time-sensitive (license suspension hearings); a page that does not explain the immediate process or route to the consultation loses prospects who must act fast, suppressing the urgent enquiries that drive more DWI cases to the goal.

Recommended change (module): Add a 'DWI First Steps + License Suspension Process' block and a 'Free Case Evaluation' CTA specific to DWI on the DWI page.

Implementation brief — ACT-001 (GB-001)

OWNER CONFIRMATION REQUIRED BEFORE PUBLICATION: The lead attorney must approve after-arrest guidance, free-consultation wording and any response-time promise before publish.

Exact placement: Insert the 'Immediate Next Steps' block directly under the Criminal Defense intro, and place the high-visibility 'Free Case Evaluation' CTA above the page footer.

Scope note: Scope is limited to the criminal-defense service page and the free-case-evaluation CTA/highlight; does not change fee terms already stated on the site. Price or structured fees are NOT added here (owner confirmation required).

Owner confirmation questions:

1. Is the initial consultation genuinely free and is it confidential?
2. Which after-arrest steps can the firm publicly advise for all Texas cases?
3. Can the firm commit a response-time for the free consultation request?

Required page-module fields:

- Immediate-next-steps block
- Free Case Evaluation CTA with phone + form
- No-upfront-fee trust line

Approved-copy placeholder: [Insert attorney-approved after-arrest + consultation wording before publication.]

CTA destination: <https://thebrunnerlawfirm.com/contact.html> (contact/case-eval form) + tel link

QA requirements: Mobile + desktop: CTA and form link resolve; after-arrest steps render without clipping.

Baseline & review criteria: Record criminal-defense page to contact-form clicks and phone calls for 14 business days before the change.

Scale rule: A pattern can expand from criminal-defense evidence only: (1) contact/conversion rate improves versus the 14-day baseline; (2) lead quality does not fall where phone/CRM data available; (3) no operational or client-confusion issue; (4) the owner approves expansion. If no analytics data provided, no scale decision can be made beyond public QA.

Implementation brief — ACT-002 (GB-002)

OWNER CONFIRMATION REQUIRED BEFORE PUBLICATION: The owner/service manager must approve the response-time and free/confidential wording before publish.

Exact placement: Insert the 3-step explainer BELOW the form so the form stays above the fold on mobile.

Scope note: Scope is the /contact.html form trust/expectation block only. Does not change the form's data collection, the submit destination, or any legal/availability claim without owner confirmation.

Owner confirmation questions:

1. What response-time can the firm publicly commit?
2. Is the initial consultation and case evaluation free and confidential — confirm wording?
3. Which next steps can be described after form submission?

Required page-module fields:

- 3-step What-happens-next
- Response-time promise
- Free & confidential consultation line

Approved-copy placeholder: [Insert attorney-approved response-time + confidentiality wording before publication.]

CTA destination: <https://thebrunnerlawfirm.com/contact.html> (the form itself)

QA requirements: Mobile: form fields remain above the fold; Desktop: 3-step block inline, no overflow.

Baseline & review criteria: Record form-start and form-submit rate for 14 business days before the change.

Scale rule: A pattern can expand from contact-form trust/expectation evidence only when its contact form-start to form-submit completion rate improves versus the recorded 14-day baseline using that action-specific first signal; and only if (1) the relevant click/conversion rate improves versus baseline; (2) lead quality does not fall where phone/CRM data is available; (3) there is no operational or client-confusion issue; (4) the owner approves the expansion. If no analytics/CRM data is provided, no scale decision can be made beyond public QA.

Implementation brief — ACT-003 (GB-003)

OWNER CONFIRMATION REQUIRED BEFORE PUBLICATION: The lead attorney must approve the situation-to-practice routing before publish.

Exact placement: Insert the selection aid between the hub intro and the practice-area list.

Scope note: Scope is the /practice-areas.html self-routing aid for ambiguous charges. Does not reword any practice area's actual legal scope; only helps the visitor self-select toward the right page/consultation.

Owner confirmation questions:

1. Which situation maps to which practice area?
2. Can each answer route to the matching practice page and contact form?

Required page-module fields:

- Self-routing aid
- Situation questions
- Route-to-practice links
- Free consultation CTA

Approved-copy placeholder: [Insert attorney-approved routing wording before publication.]

CTA destination: <https://thebrunnerlawfirm.com/contact.html>

QA requirements: Mobile: aid stacks; Desktop: no overflow; every route link resolves.

Baseline & review criteria: Record hub-to-practice-page and hub-to-contact clicks for 14 business days.

Scale rule: A pattern can expand from self-routing aid evidence only when its practice-hub to practice-page and to-contact click improves versus the recorded 14-day baseline using that action-specific first signal; and only if (1) the relevant click/conversion rate improves versus baseline; (2) lead quality does not fall where phone/CRM data is available; (3) there is no operational or client-confusion issue; (4) the owner approves the expansion. If no analytics/CRM data is provided, no scale decision can be made beyond public QA.

Implementation brief — ACT-004 (GB-004)

OWNER CONFIRMATION REQUIRED BEFORE PUBLICATION: The lead attorney must approve the consultation wording and mistakes list before publish.

Exact placement: Insert the CTA callout after the first two sections and again before the conclusion.

Scope note: Scope is the blog post </blog/what-to-do-after-an-arrest-in-texas.html> consultation/phone CTA treatment. Does not add content beyond the stated CTA; no automated scheduling or new page is built.

Owner confirmation questions:

1. Can the firm commit a response-time for blog-sourced consultation requests?
2. Which 'mistakes to avoid' apply to all Texas cases?

Required page-module fields:

- Mid-article Free Consultation CTA with phone
- When-to-talk-to-a-lawyer callout
- Top-mistakes-to-avoid list

Approved-copy placeholder: [Insert attorney-approved consultation + mistakes wording before publication.]

CTA destination: <https://thebrunnerlawfirm.com/contact.html> + tel link

QA requirements: Mobile + desktop: CTA renders, phone link tap works, no clipping.

Baseline & review criteria: Record blog to contact/consultation clicks for 14 business days.

Scale rule: A pattern can expand from blog consultation-CTA treatment only when its blog to consultation/contact click improves versus the recorded 14-day baseline using that action-specific first signal; and only if (1) the relevant click/conversion rate improves versus baseline; (2) lead quality does not fall where phone/CRM data is available; (3) there is no operational or client-confusion issue; (4) the owner approves the expansion. If no analytics/CRM data is provided, no scale decision can be made beyond public QA.

Implementation brief — ACT-005 (GB-005)

OWNER CONFIRMATION REQUIRED BEFORE PUBLICATION: The lead attorney must approve DWI guidance, license-suspension summary and consultation wording before publish.

Exact placement: Insert the DWI first-steps block under the DWI page intro and a DWI-specific CTA near the footer.

Scope note: Scope is the DWI service page immediate-action + CTA treatment only. Pricing, retainer or firm commitment wording is deferred; license-suspension facts are not asserted without owner confirmation.

Owner confirmation questions:

1. What DWI-specific first steps can the firm publicly advise?
2. Can the license-suspension hearing process be summarized accurately?
3. What response-time can be promised?

Required page-module fields:

- DWI first-steps block
- License-suspension process
- DWI Free Case Evaluation CTA

Approved-copy placeholder: [Insert attorney-approved DWI guidance before publication.]

CTA destination: <https://thebrunnerlawfirm.com/contact.html> + tel link

QA requirements: Mobile + desktop: block renders, CTA resolves, no clipping.

Baseline & review criteria: Record DWI page to contact clicks and calls for 14 business days.

Scale rule: A pattern can expand from DWI immediate-action treatment only when its DWI page to contact click and call rate improves versus the recorded 14-day baseline using that action-specific first signal; and only if (1) the relevant click/conversion rate improves versus baseline; (2) lead quality does not fall where phone/CRM data is available; (3) there is no operational or client-confusion issue; (4) the owner approves the expansion. If no analytics/CRM data is provided, no scale decision can be made beyond public QA.

First 7-Day Win

ACT-005 — Add a 'DWI First Steps + License Suspension Process' block and a 'Free Case Evaluation' CTA specific to DWI on the DWI page. [VALIDATE FIRST (owner approval required before publication)]

Single customer page: <https://thebrunnerlawfirm.com/practice-areas/dwi-dui-defense.html>

Why this is the First 7-Day Win: it is low-risk and reversible, targets a single customer-owned URL, and directly improves the conversion journey for the goal (more enquiries (client intake)). See Implementation Brief GB-005 for the full brief.

What Not To Prioritise Yet

For The Brunner Law Firm specifically, the evidence does not yet justify spending on paid advertising, a full site redesign, or any expansion beyond the documented customer-owned page changes above — the gaps here are cheaper and higher-leverage first.

Commercial Opportunity Model

Value lever: demand capture + page clarity on the customer's own conversion route. **Publicly observable evidence:** the customer-owned pages documented in the evidence cards currently omit the decision inputs (pricing/detail, post-submission expectation, proof, self-routing or first-steps guidance) that a conversion-stage visitor needs. **Client data required to quantify upside:** contact/enquiry submissions, CTA clicks, call or booking rate (GSC/GA4 or CRM when the owner provides access). Any effect is an assumption to be measured, never a forecast guarantee; no revenue figure is claimed.

Investment Decision Matrix

DO NOW

- None in this report (all actions need owner confirmation).

VALIDATE FIRST (pending owner approval)

- ACT-001 — Add an 'Immediate Next Steps After an Arrest' block and a prominent 'Free Case Evaluation' CTA with a phone+form high-light, plus a short 'No upfront fee for the initial consultation' trust line on the criminal-defense page. (on <https://thebrunnerlawfirm.com/practice-areas/criminal-defense.html>); requires owner confirmation before publication.
- ACT-002 — Add a 3-step 'What happens next' under the form (1 review request, 2 call back within stated time, 3 confidential free evaluation) plus a 'Free & confidential initial consultation' trust line. (on <https://thebrunnerlawfirm.com/contact.html>); requires owner confirmation before publication.
- ACT-003 — Add a 'Which practice area applies to my situation?' selection aid with charge/situation questions routing to the matching practice page, plus a final route to the free

consultation. (on <https://thebrunnerlawfirm.com/practice-areas.html>); requires owner confirmation before publication.

- ACT-004 — Add a contextually placed 'Free Confidential Consultation' CTA (phone + form link) mid-article and a 'When to talk to a lawyer' callout, plus a 'Top mistakes to avoid' list. (on <https://thebrunnerlawfirm.com/blog/what-to-do-after-an-arrest-in-texas.html>); requires owner confirmation before publication.
- ACT-005 — Add a 'DWI First Steps + License Suspension Process' block and a 'Free Case Evaluation' CTA specific to DWI on the DWI page. (on <https://thebrunnerlawfirm.com/practice-areas/dwi-dui-defense.html>); requires owner confirmation before publication.

DEFER / DO NOT PRIORITISE YET

Defer spending on paid advertising, a full site redesign, or any expansion beyond the actions above until the customer-owned page changes are proven against their baselines. No competitor action, external links, or unbudgeted work is part of this 90-day plan without evidence.

Customer Journey Map

Buyer stage	Customer-owned page	Observed friction	Action ID	Intended first signal
Immediate need / awareness (arrest or charge)	The Brunner Law Firm homepage + DWI/criminal-defense pages	no after-arrest first-steps guidance, anxious prospect may not act	GB-001 / GB-005	page to contact/consultation click + call
Practice-area selection (which charge?)	/practice-areas.html	no self-routing aid for ambiguous charge	GB-003	hub to practice-page or to-contact click
Trust / educational (what to do)	/blog/what-to-do-after-an-arrest-in-texas.html	blog builds trust but no prominent in-body consultation CTA	GB-004	blog to consultation/contact click
Consultation enquiry	/contact.html	form gives no post-submission expectation, free/confidential not confirmed	GB-002	form-start to form-submit completion rate
Client intake / engagement	internal workflow / owner-confirmation item	data needed before performance assessment	—	owner-supplied case/CRM data
Client intake / follow-up	internal workflow / owner-confirmation item	data needed before performance assessment	—	owner-supplied order/quote/case data

90-Day Execution Roadmap

Days 0-7: No DO NOW actions eligible for Days 0-7; prepare drafts for the VALIDATE FIRST actions.

Days 8-30: Collect owner-approved policy/process inputs and prepare draft modules: ACT-001 draft layout prepared; collect owner-approved inputs (approver Lead Attorney / Managing Partner); ACT-002 draft layout prepared; collect owner-approved inputs (approver Owner / Service Manager); ACT-003 draft layout prepared; collect owner-approved inputs (approver Lead Attorney / Managing Partner); ACT-004 draft layout prepared; collect owner-approved inputs (approver Lead Attorney / Managing Partner); ACT-005 draft layout prepared; collect owner-approved inputs (approver Lead Attorney / Managing Partner); record 14-day baselines for all pages. ACT-004: prepare the draft layout AND collect Sales/Operations-approved method-to-project routing rules.

Days 31-60: ACT-001 published only after owner approval; ACT-002 published only after owner approval; ACT-003 published only after owner approval; ACT-004 published only after owner approval; ACT-005 published only after owner approval; measure page CTA/form behaviour. ACT-004: publish ONLY after the method-to-project routing rules are approved; if approval is not provided, retain VALIDATE FIRST and do not route visitors using unapproved business rules.

Days 61-90: Measure every page against its 14-day baseline using the action-specific first signal; extend only the proven pattern per the card's quantified scale rule (rate improves vs baseline + lead quality not down + no confusion + owner approval). ACT-004: measure method-selection completion and homepage-to-service-page clicks against baseline only after the approved module is live. Do not spend on deferred work (paid links, redesign, new store, unbudgeted expansion) unless evidence supports it.

Top Priority Actions

ACT-001 — Add an 'Immediate Next Steps After an Arrest' block and a prominent 'Free Case Evaluation' CTA with a phone+form high-light, plus a short 'No upfront fee for the initial consultation' trust line on the criminal-defense page.

Primary customer URL (single): <https://thebrunnerlawfirm.com/practice-areas/criminal-defense.html>

Investment status: VALIDATE FIRST

Business mechanism: A person arrested faces anxiety and urgency; the criminal defense page stops at coverage+prep and does not convert hesitancy into action, so a worried prospect leaves without booking the free consultation, suppressing the engagement enquiries that drive the goal (more leads for the firm).

Definition of done: QA-pass on the live customer page <https://thebrunnerlawfirm.com/practice-areas/criminal-defense.html>: the Add an 'Immediate Next Steps After an Arrest' block and a prominent 'Free Case Evaluation' CTA with a phone+form high-light, plus a short 'No upfront fee for the initial consultation' trust line on the criminal-defense page. module renders and its links work on mobile and desktop, the page passes a content check by the approver (Lead Attorney / Managing Partner) and QA by Web/Developer, and no text is clipped. See Implementation Brief ACT-001 for complete requirements.

First measurable signal: criminal-defense page to contact-form click and call rate

Scale rule: A pattern can expand from criminal-defense evidence only: (1) contact/conversion rate improves versus the 14-day baseline; (2) lead quality does not fall where phone/CRM data

available; (3) no operational or client-confusion issue; (4) the owner approves expansion. If no analytics data provided, no scale decision can be made beyond public QA.

Review window: 30-60 days

Approver: Lead Attorney / Managing Partner

Content owner: Content/Marketing

Publisher / QA: Web/Developer

Effort: Medium

Approval dependency: OWNER CONFIRMATION REQUIRED BEFORE PUBLICATION: confirm the after-arrest guidance and any 'free consultation'/'no upfront fee' wording before publish.

ACT-002 — Add a 3-step 'What happens next' under the form (1 review request, 2 call back within stated time, 3 confidential free evaluation) plus a 'Free & confidential initial consultation' trust line.

Primary customer URL (single): <https://thebrunnerlawfirm.com/contact.html>

Investment status: VALIDATE FIRST

Business mechanism: Post-submission expectation and trust are decision-stage blockers for an anxious new client; a form with no response-time and no free/confidential confirmation suppresses form completions, directly limiting the engagement enquiries that drive more leads.

Definition of done: QA-pass on the live customer page <https://thebrunnerlawfirm.com/contact.html>: the Add a 3-step 'What happens next' under the form (1 review request, 2 call back within stated time, 3 confidential free evaluation) plus a 'Free & confidential initial consultation' trust line. module renders and its links work on mobile and desktop, the page passes a content check by the approver (Owner / Service Manager) and QA by Web/Developer, and no text is clipped. See Implementation Brief ACT-002 for complete requirements.

First measurable signal: contact form-start to form-submit completion rate

Scale rule: A pattern can expand from contact-form trust/expectation evidence only when its contact form-start to form-submit completion rate improves versus the recorded 14-day baseline using that action-specific first signal; and only if (1) the relevant click/conversion rate improves versus baseline; (2) lead quality does not fall where phone/CRM data is available; (3) there is no operational or client-confusion issue; (4) the owner approves the expansion. If no analytics/CRM data is provided, no scale decision can be made beyond public QA.

Review window: 30-60 days

Approver: Owner / Service Manager

Content owner: Service/Content

Publisher / QA: Web/Developer

Effort: Medium

Approval dependency: OWNER CONFIRMATION REQUIRED BEFORE PUBLICATION: confirm the response-time promise, free-consultation and confidentiality wording before publish.

ACT-003 — Add a 'Which practice area applies to my situation?' selection aid with charge/situation questions routing to the matching practice page, plus a final route to the free consultation.

Primary customer URL (single): <https://thebrunnerlawfirm.com/practice-areas.html>

Investment status: VALIDATE FIRST

Business mechanism: A prospect with an ambiguous charge needs a self-routing aid; without one they cannot confirm the firm handles their matter, reducing the progression from hub to the relevant practice page to the free consultation, suppressing leads.

Definition of done: QA-pass on the live customer page <https://thebrunnerlawfirm.com/practice-areas.html>: the Add a 'Which practice area applies to my situation?' selection aid with charge/situation questions routing to the matching practice page, plus a final route to the free consultation. module renders and its links work on mobile and desktop, the page passes a content check by the approver (Lead Attorney / Managing Partner) and QA by Web/Developer, and no text is clipped. See Implementation Brief ACT-003 for complete requirements.

First measurable signal: practice-hub to practice-page and to-contact click

Scale rule: A pattern can expand from self-routing aid evidence only when its practice-hub to practice-page and to-contact click improves versus the recorded 14-day baseline using that action-specific first signal; and only if (1) the relevant click/conversion rate improves versus baseline; (2) lead quality does not fall where phone/CRM data is available; (3) there is no operational or client-confusion issue; (4) the owner approves the expansion. If no analytics/CRM data is provided, no scale decision can be made beyond public QA.

Review window: 30-60 days

Approver: Lead Attorney / Managing Partner

Content owner: Content/Marketing

Publisher / QA: Web/Developer

Effort: Medium

Approval dependency: OWNER CONFIRMATION REQUIRED BEFORE PUBLICATION: confirm the situation-to-practice routing is correct before publish.

ACT-004 — Add a contextually placed 'Free Confidential Consultation' CTA (phone + form link) mid-article and a 'When to talk to a lawyer' callout, plus a 'Top mistakes to avoid' list.

Primary customer URL (single): <https://thebrunnerlawfirm.com/blog/what-to-do-after-an-arrest-in-texas.html>

Investment status: VALIDATE FIRST

Business mechanism: Educational content earns trust but only converts if the reader is guided to act; a post with no prominent consultation/phone CTA loses high-intent readers, leaving leads on the table versus the conversion the goal needs.

Definition of done: QA-pass on the live customer page <https://thebrunnerlawfirm.com/blog/what-to-do-after-an-arrest-in-texas.html>: the Add a contextually placed 'Free Confidential Consultation' CTA (phone + form link) mid-article and a 'When to talk to a lawyer' callout, plus a 'Top mistakes to avoid' list. module renders and its links work on mobile and desktop, the page passes a content check by the approver (Lead Attorney / Managing Partner) and QA by Web/Developer, and no text is clipped. See Implementation Brief ACT-004 for complete requirements.

First measurable signal: blog to consultation/contact click

Scale rule: A pattern can expand from blog consultation-CTA treatment only when its blog to consultation/contact click improves versus the recorded 14-day baseline using that action-specific first signal; and only if (1) the relevant click/conversion rate improves versus baseline; (2) lead quality does not fall where phone/CRM data is available; (3) there is no operational or client-confusion issue; (4) the owner approves the expansion. If no analytics/CRM data is provided, no scale decision can be made beyond public QA.

Review window: 30-60 days

Approver: Lead Attorney / Managing Partner

Content owner: Content/Marketing

Publisher / QA: Web/Developer

Effort: Medium

Approval dependency: OWNER CONFIRMATION REQUIRED BEFORE PUBLICATION: confirm the free/confidential consultation wording and 'top mistakes' guidance before publish.

ACT-005 — Add a 'DWI First Steps + License Suspension Process' block and a 'Free Case Evaluation' CTA specific to DWI on the DWI page.

Primary customer URL (single): <https://thebrunnerlawfirm.com/practice-areas/dwi-dui-defense.html>

Investment status: VALIDATE FIRST

Business mechanism: DWI is time-sensitive (license suspension hearings); a page that does not explain the immediate process or route to the consultation loses prospects who must act fast, suppressing the urgent enquiries that drive more DWI cases to the goal.

Definition of done: QA-pass on the live customer page <https://thebrunnerlawfirm.com/practice-areas/dwi-dui-defense.html>: the Add a 'DWI First Steps + License Suspension Process' block and a 'Free Case Evaluation' CTA specific to DWI on the DWI page. module renders and its links work on mobile and desktop, the page passes a content check by the approver (Lead Attorney / Managing

Partner) and QA by Web/Developer, and no text is clipped. See Implementation Brief ACT-005 for complete requirements.

First measurable signal: DWI page to contact click and call rate

Scale rule: A pattern can expand from DWI immediate-action treatment only when its DWI page to contact click and call rate improves versus the recorded 14-day baseline using that action-specific first signal; and only if (1) the relevant click/conversion rate improves versus baseline; (2) lead quality does not fall where phone/CRM data is available; (3) there is no operational or client-confusion issue; (4) the owner approves the expansion. If no analytics/CRM data is provided, no scale decision can be made beyond public QA.

Review window: 30-60 days

Approver: Lead Attorney / Managing Partner

Content owner: Content/Marketing

Publisher / QA: Web/Developer

Effort: Medium

Approval dependency: OWNER CONFIRMATION REQUIRED BEFORE PUBLICATION: confirm DWI-specific guidance, license-suspension process and any fee/consultation wording before publish.

Source / Evidence Appendix

Card	Customer URL	Direct observation
GB-001	https://thebrunnerlawfirm.com/practice-areas/criminal-defense.html	Criminal Defense page states coverage (misdemeanor+felony, TX state and federal) and describes case preparation (discovery, witness interviews, motion practice), and mentions 'Flat fees for most matters' and 'payment plans available', but does not list any case results, outcomes, or testimonials as proof, and does not answer what to do immediately after an arrest or how long a case typically takes.
GB-002	https://thebrunnerlawfirm.com/contact.html	Contact page has a form (fields: name, email, practice, subject, message) with 'Free Consultation' and 'Contact Us' CTA text, and hours 'Monday-Friday 9:00 AM-6:00 PM CT', but gives no statement of what happens after submission (response time, next step, whether the consultation is confidential/free), and no proof of past work from this page.
GB-003	https://thebrunnerlawfirm.com/practice-areas.html	Practice Areas hub lists coverage ('Criminal defense is what we do... from misdemeanor citations to first-degree felonies') but only enumerates practice-area names with no guidance helping a prospect self-identify which

		charge/area applies to their specific situation, and no per-practice fee guidance.
GB-004	https://thebrunnerlawfirm.com/blog/what-to-do-after-an-arrest-in-texas.html	Blog post educates on what to do after a Texas arrest, but does not clearly route a reader to the firm's free consultation CTA from within the body, and does not include a 'Do NOT do this' or 'choose a lawyer' reference from this page — the educational trust asset does not convert to a contact.
GB-005	https://thebrunnerlawfirm.com/practice-areas/dwi-dui-defense.html	DWI/DUI page mentions coverage and 'license suspension hearings' but gives no concrete first-steps for a DWI stop/arrest, no fee guidance specific to DWI, and no proof of prior DWI defense outcomes — similar to the criminal-defense page but for the DWI audience.

This report uses public-web research on publicly accessible pages unless otherwise stated; search results change; no outcome is guaranteed. Competitor sites appear only as sources, never as work targets.
